About Me

Recent computer science graduate with a passion for developing scalable web applications and working across the full stack. I am looking for a job where I can grow my skill set and try to a kick-start for my career.

Projects

Clockify Clone | A project tracking website
GitHub Repo | Group Project
Tech-Stack used: HTML, CSS, JavaScript(ES6&ES5)

Details:
- We have used GitHub for collaboration.
- I created the upgrade page, selection page, address page, checkout page.
- The functionality we are adding in the project are:
  1. Sign Up & Log In
  2. Create project
  3. Adding client
  4. Subscription
  5. Payment page

Geekbuying.com Clone | An Ecommerce website
GitHub Repo | Group Project
Tech-Stack used: HTML, CSS & Vanilla JS

Details:
- In this project, I lead the team.
- I created the brand page, product page, clearance page, Address Page.
- The functionality those are working in this project are:
  1. Sign Up & Log In
  2. Product page
  3. Checkout page
  4. Payment Page
- We tried to replicate as similar as the original website.

Ecommerce Admin Panel | This application is use for seller to add their product.
GitHub Repo | Individual Project
Tech-Stack used: HTML, CSS, JavaScript(ES6&ES5), Server JS, Heroku

Details:
- This is my first individual project where I have applied all of my web development skills
- All the functionality are working :
  1. Product add
  2. Product sort
  3. Product filter

CERTIFICATE

Programming with Python:
